

Freighter apron at 976 m, rail siding at 600 m.

From late 2026 Kutaisi becomes Georgia's first ICAO Code F airfield, able to take freighters without aircraft-type restriction. 3.63 hectares of non-agricultural land sit 976 m from the apron and 600 m from the Kopitnari rail siding, with 422 m of frontage on the Kutaisi–Samtredia state road. Offered directly by the owner.

WHAT CONNECTS AT THIS PARCEL

MODE	DISTANCE
Air — Kutaisi International (KUT) 3,620 m Code F runway from late 2026; state-owned via United Airports of Georgia	976 m
Rail — Kopitnari station and siding Rebuilt 2022; connects Poti and Batumi ports to the Azerbaijan corridor	600 m
Road — S204 state highway Nakhshirghele–Kutaisi–Samtredia; Rikoti four-lane route to Tbilisi completed Dec 2025	10 m — 422 m of frontage
Sea — Poti / future Anaklia Anaklia deep-water phase one targeted 2029, at least 600,000 TEU	≈ 107 km

3,620 m

Code F runway, GEL 240 m state project, opening late 2026

600 m

To the Kopitnari rail siding — road, rail and apron inside one kilometre

3.63 ha

One title, flat, no assembly and no demolition

THE SITE

AREA	36,318 sq m (3.63 ha), one consolidated title
CADASTRE	29.11.34.255, Tskaltubo Municipality (Partskhanakanevi), Imereti
STATUS	Non-agricultural — buildable without a change of land status, and open to direct foreign ownership, which agricultural land in Georgia is not
TITLE	Freehold, two registered co-owners; no mortgage, lien or prohibition registered. Privatised from the state at unconditional auction, 2021
ACCESS	422 m of frontage on the Kutaisi–Samtredia state road, 10 m off the centreline; 976 m to the passenger terminal (1.95 km / 3.3 min by road), 600 m to Kopitnari rail station
HEIGHT	Construction cleared to +83 m above sea level within the airfield's obstacle-limitation surface (United Airports of Georgia, letter N152, 2019); exact heights agreed with the operator before building

WHY HERE RATHER THAN THE CITY

- **Air cargo needs land beside the apron, not in town.** Bonded storage, cold chain and e-commerce fulfilment are worth building only where the truck leg to the aircraft is minutes. Nothing of the kind exists within 2 km of this terminal.
- **The Middle Corridor is the traffic.** Georgia sits on the Trans-Caspian route between China and Europe; Kopitnari puts a siding 600 m from this plot, and the Hualing free industrial zone operates in the same corridor.
- **State-owned airport with a declared logistics strategy.** Kutaisi is the only major Georgian airport not under foreign concession; United Airports of Georgia has stated an intention to build a regional aviation and logistics hub.
- **Non-agricultural title, foreign-ownable, no conversion.** Warehousing on agricultural land requires reclassification, and a foreign-owned company cannot hold agricultural land in Georgia at all. This parcel needs neither step.
- **Flat, single title, 422 m of frontage.** Yard layout and HGV access are set by frontage and shape, not just area — and this is the only parcel of its kind at the airport with either.

SUPPLY POSITION — PUBLIC REGISTRY, 31 JULY 2026

Of 1,277 registered parcels within 3 km of the terminal, 27 are non-agricultural and over 1 ha within 2 km of it. Eight of those sit in Tskaltubo and are not airport-operational land. Seven of the eight belong to United Airports of Georgia, Sakaeronavigatsia, Kinor Kutaisi Airport, Georgian Railway or an on-site business. This is the only one in private hands, and the only one of the eight with more than 100 m of highway frontage.

TERMS — ALL THREE STRUCTURES ARE OPEN

Freehold sale of the whole title, unencumbered, masterplan work included	USD 1,500,000
Long-term registered ground lease, indexed, rent-free during construction	by agreement
Option to purchase with exclusivity while permitting runs, fee credited against price	by agreement

Please read. Anaklia funding was reduced in the 2026 state budget and its phase-one date should be treated as upside, not schedule. No cargo terminal, bonded-warehouse licence or rail siding connection agreement is in place, and the siding's capacity and access terms must be agreed with Georgian Railway. Utility capacities, in particular electrical supply in kVA, are not yet confirmed. The 2019 clearances on file from United Airports of Georgia, the Roads Department, Georgian Railway and Tskaltubo City Hall concern disposal and building coordination — they are not construction permits, and none is held. The +83 m height clearance was issued for the airfield as it stood in 2019; the new runway will redraw the obstacle-limitation surfaces and it should be re-confirmed. Passenger, runway and hotel-supply figures are drawn from airports.ge, the Ministry of Economy and published reporting; the parcel counts are from the National Agency of Public Registry, retrieved 31 July 2026, and are reproducible from the scripts in the data room. Nothing here is an offer capable of acceptance.
